Dean's Dashboard User Guide

OUTLINE

Version 1: 27 March 2015

TABLE OF CONTENTS

About this guide xi

Module I: What is the Dean's Dashboard? .....#

1. Introduction to the Dean's Dashboard .....#

2. School performance .....#
   2.1. Key performance areas ..... #
   2.2. Key performance indicators ..... #

3. Organizational readiness ..... #

4. Best practices in planning and implementing a Dean's Dashboard ..... #
   4.1. Step-by-step guide ..... #

Module II: End User Guide ..... #

6. Introduction to the End Users' Guide ..... #

7. The DHIS 2 foundational software ..... #
   7.1. Background ..... #
   7.2. Key features and purpose ..... #
   7.3. Use of DHIS 2 for data collection, processing, interpretation, and analysis. ..... #
   7.4. Technical background ..... #
   7.5. Difference between aggregated and individual data ..... #
   7.6. Free and Open Source Software (FOSS): benefits and challenges ..... #

8. Getting started ..... #
   8.1. Getting started ..... #
   8.2. Logging on ..... #
   8.3. Logging out ..... #
   8.4. Quick intro to designing a database..... #

9. Data entry ..... #

10. Using Data Quality functionality ..... #
   10.1. Overview of data quality checks ..... #
   10.2. Data quality checks ..... #
   10.3. Running Validation Rule Analysis ..... #
   10.4. Standard Deviation Outlier Analysis ..... #
   10.5. Min-Max Outlier Analysis ..... #
   10.6. Gap Analysis ..... #
   10.7. Follow-Up Analysis ..... #

11. Using Data Visualizer ..... #
   11.1. Data Visualizer overview ..... #
   11.2. Selecting chart type ..... #
   11.3. Selecting series, category and filter ..... #
   11.4. Selecting indicators and data elements ..... #
   11.5. Selecting reporting rates ..... #

11.6. Selecting fixed and relative periods ..... #
11.7. Selecting organization units ..... #
11.8. Selecting organization unit group sets and data element group sets ..... #
11.9. Selecting chart options ..... #
11.10. Displaying a chart ..... #
11.11. Downloading chart as image or PDF ..... #
11.12. Saving chart as favorite ..... #
11.13. Sharing interpretations ..... #
11.14. Embed charts in any web page ..... #
11.15. Analysis integration ..... #
11.16. Exiting the data visualizer module ..... #

12. Dashboards ..... #
12.1. Setting up the dashboard ..... #
12.2. Messages and feedback ..... #

Module III: Administrator Guide ..... #

13. Introduction to the Administrator's Guide ..... #

14. Organization units ..... #
14.1. The organizational hierarchy ..... #
14.2. Organization unit maintenance ..... #

15. Data elements ..... #
15.1. Data element maintenance ..... #

16. Data sets and data entry forms ..... #
16.1. Data sets ..... #
16.2. Data Entry Forms ..... #

17. User management ..... #
17.1. Creating new users and roles ..... #

18. Sharing ..... #
18.1. Sharing of objects ..... #
18.2. Sharing and access control ..... #
18.3. Sharing applied ..... #

19. Setting up Data Quality functionality ..... #
19.1. Overview of data quality check ..... #
19.2. Data quality checks ..... #
19.3. Data quality check at the point of data entry ..... #
19.4. Validation Rule ..... #
19.5. Surveillance Rule ..... #
19.6. Validation Rule Group ..... #

20. Indicator maintenance ..... #

21. Using reporting functionality ..... #
21.1. Reporting functionality ..... #
21.2. Using standard reports ..... #
21.3. Using report tables ..... #

21.4. Using dataset reports ..... #
21.5. Using resources ..... #
21.6. Using reporting rate summary ..... #
21.7. Using organization unit distribution reports ..... #

22. Using Pivot Table ..... #
22.1. Pivot Table overview ..... #
22.2. Selecting dimension items ..... #
22.3. Arranging the table layout ..... #
22.4. Using table options ..... #
22.5. Creating a favorite ..... #
22.6. Analysis integration ..... #
22.7. Downloading data ..... #
22.8. Sharing interpretations ..... #
22.9. Embed tables in any web page ..... #
22.10. Constraints ..... #

23. Data approval ..... #
23.1. Approving and accepting ..... #
23.2. Authorities for approving data ..... #
23.3. Configure approving data ..... #
23.4. Approving data ..... #
23.5. Approving by category option group set ..... #

24. Import and export ..... #
24.1. Meta-data import ..... #
24.2. Importing data ..... #
24.3. Exporting data and meta-data ..... #

25. Data Administration ..... #
25.1. Data browser ..... #
25.2. Data integrity ..... #
25.3. Maintenance ..... #
25.4. Resource tables ..... #
25.5. Locale Management ..... #
25.6. SQL View ..... #
25.7. Organization unit merge ..... #
25.8. Duplicate data elimination ..... #
25.9. Data statistics ..... #
25.10. Lock exceptions ..... #
25.11. Min-Max Value Generation ..... #
25.12. Constant ..... #
25.13. Option sets ..... #
25.14. Cache Statistics ..... #
25.15. Attributes ..... #
25.16. Scheduling ..... #
25.17. Data synchronization ..... #

26. Settings ..... #
26.1. System settings ..... #

27. Data dimensions ..... #
27.1. The core building blocks describing the data ..... #

27.2. The data element dimension ..... #
27.3. The organization unit dimension ..... #
27.4. The time (period) dimension ..... #
27.5. Data collection vs. data analysis ..... #
27.6. Some more examples ..... #
27.7. How this works in pivot tables ..... #
27.8. From paper for to multidimensional datasets - lessons learned ..... #

28. User profiles ..... #
28.1. User settings ..... #
28.2. User profile ..... #

Glossary ..... #
Bibliography ..... #
Index ..... #
